AI Video Analysis Agent

Project Notes

Version 1.0.0

Overview

AI Video Analysis Agent is a modular Streamlit application for AI-powered video analysis.

Objectives

Build a modular architecture, automate video analysis, support multiple AI providers, generate reports and exports.

Architecture

Agent → Service → Provider architecture separates workflow, business logic, and AI integrations.

Workflow

Upload → Metadata → Audio → Transcript → AI Analysis → Chat → Report → Export.

Modules

Agents, Services, Providers, UI, Utilities, Workflows, Tests, Documentation.

Testing

Project includes 531 passing automated tests using Pytest.

Documentation

Comprehensive documentation covers API, architecture, installation, workflow, testing, security, and user guides.

Future Roadmap

OCR, REST API, Docker, Authentication, Cloud Deployment, Database.

Thank You

Thank you for using AI Video Analysis Agent.
